

This is the program design phase of the Arithmetic project. This assignment should be completed using PowerPoint to create a file called **arithmetic.ppt** which must be uploaded at the link below before the due date.

Create a PowerPoint slide to display the following:

1. Program requirements description in your own words.
2. Flow chart to design the sequence of tasks in the program.
3. Three different sets of test data with known correct results.

The program design needs to do the following:

1. Prompt for two different integer (whole) numbers
2. Display in the browser window:
 - a. Both entered numbers with color black and font size 14 pt.
 - b. Sum (addition) of the numbers in green and font size 14pt.
 - c. Difference (subtraction) of the numbers in red and font size 14pt.
 - d. Product (multiplication) of the numbers in blue and font size 14pt.
 - e. Quotient (division) of the numbers in purple and font size 14pt
 - f. Modulus (remainder) of the numbers in dark purple and font size 14pt.
 - g. Also display your name in the browser window.

Submit the assignment before the due time or you will lose 50% of the points.
