# Course - Program Comparison

Course: CMST 385 Section: A221

Strong Features

Learning CSS and doing the labs to enhance the knowledge.

N/A

Projects

This is my first course with UMUC and it will be my last. Requiring students to complete the course survey before doing course work is absolutely ridiculous. It baffles me that a University would prevent a student from accessing their course work and assignments without completing a survey. When I enrolled in the college this policy was not outlined and should not be required for students.

Improve/Recommend

More labs combined with the teaching. Understood while in class; however, one my own at home --brain wasn't working. I need more show-tell-do.

N/A

Not staying behind for the slower students. This makes it very boring for the students that read and do the assignments as they are supposed to. The students that have trouble should make arrangements with the professor outside of class time to get one on one assistance. This course was much further behind because of a couple students that didn't complete reading assignments then expected the professor to go over it several times because they didn't get it.
